BS-SE 01/2020 - 12/2024

SKILLS

Gmail · Laravel · jQuery · JavaScript · Ajax · REST · GraphQL · Stripe · Shopify · JIRA · Agile · Git · WooCommerce · CRM

PROJECTS

Financial Management CRM

02/2025

Financial Management CRM — Laravel

- Management of products, inventory, and customers of marketplaces stores using the Rest API and GraphQL
- Contributed to the development of a web-based e-commerce platform built with Laravel for the backend.
- Implemented product, order, and inventory management system, ensuring accurate synchronization of business operations across the platform.
- Developed integrations to push products and orders to external marketplaces and pull updated data back into the system for centralized management.
- Built real-time inventory management to maintain consistent stock levels across internal system and external sales channels.

Shopify CRM

10/2024

Shopify CRM — Laravel

- Management of products, inventory, and customers of the Shopify store using Shopify API and GraphQL

Call Center CRM

08/2023

Call Center CRM — Laravel

- Contributed to the development of a Laravel-based CRM platform for managing communication and customer data.
- Built features to manage call records, SMS activity, and user information through a centralized web-based dashboard.
- Supported dashboard functionality to help teams monitor activity and access customer-related information from a single browser-based system.

Event Management Application

01/2023

Event Management Application — Laravel (APIs)

- Contributed to the development of an Event Management System with a modular, scalable architecture.
- Contributed to the development of an Event Management System with a modular, scalable architecture.
- Designed and developed Restful APIs to support the Android team for mobile application features and workflows.
- Implemented role-based access control (RBAC) and permission handling for different user types.
- Developed access-control logic to manage user-specific features, workflows, and data visibility.

Child Monitoring App

06/2022

Child Monitoring App — Laravel (APIs)

- Monitoring child activities like contacts, calls, and messages, apps, location history, and files (photos, videos, and audios)
- Contributed to the development of a Laravel-based parental monitoring platform for an Android application.
- Designed and developed RESTful APIs for the mobile app to securely send device activity data to the backend.
- Built backend modules to store and manage installed apps, messages, call logs, media files, and location data.
- Developed secure data-handling logic to process incoming device information efficiently and reliably.
- Supported the development of an admin dashboard for viewing, monitoring, and managing child device activity.
- Collaborated with the Android team to ensure smooth API integration and consistent data flow.

Child Learning App

02/2022

Child Learning App — Laravel (APIs)

- Contributed to the backend development of an Android-based educational application for children.
- Designed and developed RESTful APIs in Laravel to support mobile application features and user workflows.
- Implemented backend business logic to handle application data processing, content delivery, and core functionality.
